COMPLETED PROJECTS

Implementation of the Microsurgery Laboratory, Division of Plastic Surgery, University of Utah (in association with Department of Anesthesia)

Implementation of the Endoscopic Lab, Division of Plastic Surgery, University of Utah

Part of Multi-Center American Red Cross Clinical Trials of Tissue Glues for Seroma Prevention in Axillary Node Dissection and Mastectomy (Co-Investigators: Dr. Ed Nelson and Dr. James McGreevy)

Development of Improved Method to Prepare Human Fibrinogen Concentrate (in association with Convatec)

The Effect of Growth Factors in Pressure Sore Healing (in association with Department of Biomedical Engineering, University of Alabama)

Endoscopic Equipment and Plating System for Rigid Fixation in Craniofacial Fractures (in association with Synthes and Chakoff Endoscopy)

Development and Improvement of Glue Delivery Systems (in association with Ethicon, Johnson and Johnson Inc.)
